DETAILED ACTION

1. Claims 21-34 remain withdrawn from consideration as drawn to a non-elected invention.

Claim Rejections - 35 USC § 103

2. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jundt, US 6,618,630.

Applicant is directed towards paragraph 5 of the previous Office Action. Applicant's June 30, 2005 REMARKS have been reviewed, but are not convincing.

Applicant's attempt at traversing the Official Notice findings as stated in the previous Office Action is inadequate. Adequate traversal is a two step process. First, Applicant must state their traversal on the record. Second, and in accordance with 37 C.F.R. § 1.111(b) which requires Applicant to specifically point out the supposed errors in the Office Action, Applicant must state why the Office Action statements are not to be considered common knowledge or well known in the art.

In this application, Applicant has clearly met step (1) as traversal of Official Notice has been taken. Second, Applicant has failed step (2) since they have failed to argue why the Official Notice statements are not to be considered common knowledge or well known in the art. Merely stating that "an integrated inventory management of on-line and off-line communications network

Art Unit: 3627

equipment is not known in the prior art” does not fulfill the second requirement for adequate traversal. Because Applicant’s traversal is inadequate, the Official Notice, e.g. common knowledge, statements are taken to be admitted as prior art. See, MPEP § 2144.03.

Regarding the quotation referred to by Applicant, the Applicant again is referred to the Jundt specification, e.g. cols. 6-7. The quotation may be no more than knowing “when the next service is needed, who performed the service procedures, any favored replacement field devices, etc.” Also, the identification data received from the system, e.g. 26 and 28, would inherently contain serial number and part number. Both referencing serial numbers and part numbers to track an item has been common knowledge in the data referencing art.

Regarding the motivation, one of ordinary skill in the art would have been drawn to the common knowledge acquiesced by Applicant to draw from. Also, the fact that the motivation could be used for a known method of inventory management system is not, in itself, determinative.

3. Note the pertinent references of interest from the attached PTO-892.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is

Art Unit: 3627

filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
